## MICHAEL CORREA

SOFTWARE DEVELOPER  
US ARMY VET  
US CITIZEN

---

From the moment I produce "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high quality software. What started with a simple "Hello World" has become a full flagged passion that only gets more exciting as the year go by.
